LEGISLATIVE COUNSEL’S DIGEST

AB 1194, as amended, Ammiano. Safe Routes to School Program.

Existing law creates the Safe Routes to School Program, administered by the Department of Transportation in consultation with the Department of the California Highway Patrol. Existing law requires the ~~department~~ *Department of Transportation* to award grants to local government agencies based on the results of a statewide competition, under which proposals submitted for funding are rated based on various factors. Existing law provides for the program to be funded from state and federal funds, as specified.

This bill would *provide that the program may fund both construction and noninfrastructure activities, as specified. The bill would* require the program to be funded by an annual appropriation in the budget act of not less than \$46,000,000, consisting of federal and state transportation funds eligible to be expended for this purpose. *The bill would require 20% of program funds to be used for noninfrastructure activities, as specified.* The bill would authorize the transfer of the responsibility for selecting projects and awarding grants from the Department of Transportation to the California Transportation Commission, at the discretion of the Transportation Agency. *The bill*

would require the Department of Transportation to employ a full-time coordinator to administer the program. The bill would also delete references to a superseded federal transportation act.
